Sixty5 Cloud

Sixty5 GCloud panels are smart connected door panels which offer an **IP65 protection rate**, ensuring durability and resistance. Flexible powering via a standard 48V PoE port (802.3af) or with 12 VDC.

Developed with the latest technology, the Sixty5 series panels run the latest Android 12 operating system, offering a smooth and modern experience. In addition, the dual-camera touch model is also available with **a 4G module for even faster and more secure connectivity.**

Take your security and communication to the next level with Golmar!

A limitless combination

Remote services

Integration with VOIP phones and concierge units

Connect the GCloud concierge unit to the remote service through the local LAN network. The panel can also be registered on SIP providers to manage the calls to guard from the panel.

Maximise the connectivity and flexibility of your system!

a global

CCTV IP

Advanced security and easy integration

NDAA compliant

Integrate cameras into your network using ONVIF, configure them remotely and record video and audio to an NVR via RTSP.

All our products are NDAA compliant to ensure peace of mind.

Golmar makes it easy for you

Connect your smart cloud door entry panel and you are ready to go

Simply connect the panel to internet with a local router or using 4G card option in the 7" touch model and you will be ready to manage the access from the cloud web service.

Upload licenses to the site, activate users and automatically share with them the QR codes created on the platform. **It's as simple as that!**

solution.

Access control

Endless possibilities

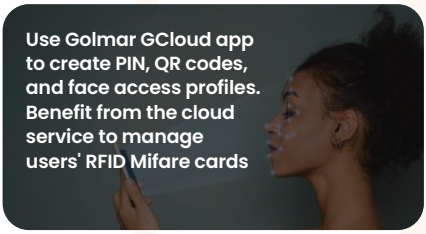

Golmar connected door panels offer multiple options to grant access:

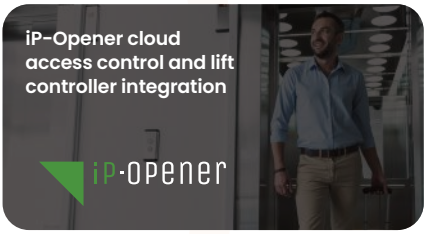

PIN code

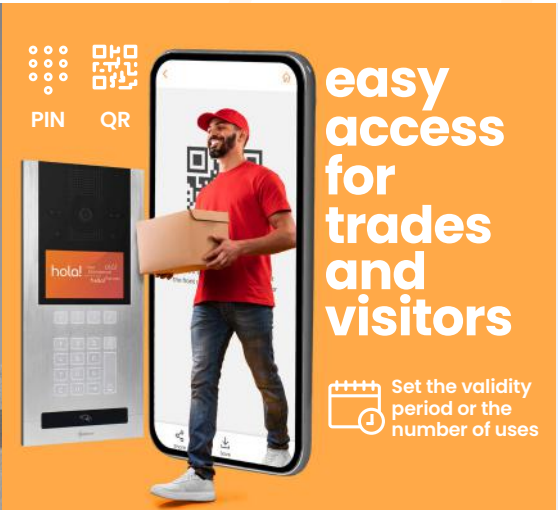

QR

RFID

Face detection

The 7" touch panel features a **dual camera for dynamic 3D face recognition access control.**
